OPEN LETTER TO ADDRESSEES BELOW

Names and Addresses withheld

Dear Gentlemen,

As a Brexit voter and campaigner, may I take this opportunity to thank you very much for your kindness, strength and patriotism in supporting Brexit. However, may I also respectfully ask for some of your spare time to read my letter?

As you are no doubt aware, many of the media platforms in this country, especially TV News channels, are now mere propaganda machines for the Metropolitan Leftist and Global Elites. Many people are aware of this and are crying out for a truthful, accurate, fair, and accountable news Channel. We desperately need an alternative point of view.

As you can see in the recent image below, supplied by Leave EU on Twitter, many organisations are taking to shutting down free speech and any alternative argument that does not fit with their own agenda.

This censorship for "wrongthink" is a dangerous attack on free speech and must be stopped.

I therefore enquire as to whether you would consider coming together to form a kind of 'Consortium' to enable a fresh, alternative, television news channel that the people of the United Kingdom so desperately needs?

You are probably wondering about who am I and what the logo on my letter represents. My name is Helen Davies. I am just a woman with a passion for her Country. In 2017, I delivered a petition direct to Mrs. May at no.10 demanding that she remove us from the political construct that is the EU and as democratically agreed in 2016. This Petition had over 1.2 million signatures, yet no media outlet, apart from a local London newspaper, would run the story. I realised then, what this Country is up against. Perhaps some thought I was trying to find some 'limelight', but that could not be further from the truth. All I wanted was the ability for the People to be heard – for in a democracy, the supreme power is invested in the People, is it not?

I believe that Globalist Elites ("One World Government – Club of Rome" – "IPPC, United Nations", "Soros") **have infiltrated our society and system – in education, charities, judiciary, journalism, politics, etc., climate change – the new BLM wave, and especially within our media.** My logo simply represents fighting against these neo-Marxists 'globalist elites' control over our society. I am on most of the social media platforms such as Twitter, Instagram, Facebook etc., and soon will reflect my investigative findings to the public on our web site, and asking people to 'open up their eyes', do their own research yet present them with the facts uncovered.

What I have found is very frightening indeed. We are fast approaching '1984!' I hope you will understand also that in these early days, I do not divulge my address and provide only, in the first instance, the contact details above, but please rest assured my letter is honest and trustworthy.

Already people are coming together to call for the BBC TV Licence to be axed. BBC and Sky appear to 'run' the country with their one-sided agendas; people believing and following like sheep to the news they hear only because they are unable to hear and see another viewpoint! And there lies a vacuum; an opportunity to bring, not only an alternative viewpoint, but the truth, fairness, independent journalism to millions of British people that is so desperately needed.

We cannot allow Britain to be controlled any more like this, and I therefore pray that you seriously consider my suggestion.

Yours hopefully,

Helen Davies
